How to Restart iPhone 7 and iPhone 7 Plus

If you are an iPhone 7 owner, you may be wondering how to restart an iPhone 7 or iPhone 7 Plus given that it does not have a clickable Home button. It turns out that iPhone 7 models do not need the pushable Home button to forcibly restart the device, because they instead rely on the volume buttons.

Forcibly Restarting iPhone 7

A forced restart is not the traditional restart procedure of shutting down and starting back up. A forced restart is typically necessary when a device has frozen or crashed or is otherwise unresponsive. Some people erroneously call it a force reset or an iPhone reset, but resetting a device actually resets it to factory settings which is not at all what a forced restart or forced reboot does.

Restart iPhone 7

- Press and Hold the DOWN VOLUME Button and Power Button to Initiate

Force Restart

- The Power button is located on the right side of the iPhone 7 device looking straight on to the glass face.
- The Volume Down button is located on the left side of the iPhone 7 if you're looking at the glass screen face.
- All you need to do is hold both Volume Down and Power concurrently to start the force restart process on iPhone 7 and iPhone 7 Plus.
- Keep Holding Volume Down and Power Until You See  Apple Logo
- Continue holding down both the Volume Down and Power buttons on iPhone 7 until you see the Apple  logo appear on the screen.
- Once the Apple logo appears on the display you can stop holding the buttons, the iPhone 7 has successfully been restarted.

Easy, right?

The key thing to remember is that with restarting iPhone 7 and iPhone 7 Plus (and likely restarting future iPad and iPhone models too, which are sure to do away with the traditional home button...) is that rather than holding the Home button, which is no longer clickable, you hold down the Volume Down button instead, which remains clickable. The power button usage remains the same.

It's different, but once you reboot an iPhone 7 this way a few times you'll learn the new habit. You'll almost certainly want to memorize it too, because the iPhone is usually on the forefront of changes made to the Apple product line up, which suggests that all future iPhone and iPad hardware without a typical clicking home button will have the same mechanism to reboot those devices.

And yes for a simple restart of iPhone 7, you can still shut down the iPhone 7 and iPhone 7 Plus and then boot it back up again as usual.

Famous People from American History

Billie Holiday (1915 – 1959) Influential and iconic jazz and blues singer. Nicknamed 'Lady Day' she developed a unique and haunting voice, influenced by the jazz musicians she played with.

Riddles You Can Tell in Class

How do you make a witch itch?

Take away her W.

What do you call a nervous witch?

A twitch.

Why wasn't there any food left after the monster party?

Because everyone was a goblin!

This Day in History

Birthdates which occurred on October 25:

1869 John Heisman pioneering football coach/trophy namesake
