## Hardware/Software

### How to use Messages in iOS 10, from special effects to iMessage apps

*Thanks to iOS 10, your Messages app is way more than a texting app. Way, way more. Now that the official release of iOS 10 is out, here's your guide to using all the new features in Messages, from sending fullscreen effects to installing your third-party iMessage apps from your favorite services like Venmo, ESPN, and OpenTable.*

*The first thing you should know is that the recipient of your messages will need an iPhone, iPod, or iPad running iOS 10, an Apple Watch running watchOS 3, or a Mac running macOS Sierra in order to view them in their full visual glory. Furthermore, these features are exclusively linked to iMessage, so Android users will have a hard time deciphering the animations as well. For users on Android or running a previous version of iOS, these messages will show up as regular text with a description of what the visual should have been, like “(sent with fireworks).” Not nearly as capitvating.*

### ***Send media and visual links***

Lastly, Messages in iOS 10 has redesigned the way you attach media, whether it's a photo in your camera roll or a video you've recorded in-app on the spot. Tap on the camera icon left of the input field and the keyboard becomes a media hub with a viewfinder for taking photos or video right there and then. You can continue browsing your camera roll by swiping left, or launch the Camera app or Photo Library by swiping right.

Also, when you send a URL to an article on the Web, Messages automatically turns it into a preview with a headline and image pulled from the link. Similarly, you can send a link to YouTube or Vimeo and have the recipients watch the video in-line. You can also play tracks from Apple Music without leaving Messages—there's even an iMessage app for sharing songs from Apple Music. In fact, every URL we sent showed up as a visual link, from Twitter links to Spotify tracks.

## **Famous People from American History**

### **Charles Lindbergh**

Aviator

Born: 4 February 1902

Died: 26 August 1974 (cancer)

Birthplace: Detroit, Michigan

Best known as: The first person to fly solo across the Atlantic Ocean

Name at birth: Charles Augustus Lindbergh

Charles Lindbergh made the first-ever solo airplane flight across the Atlantic Ocean. He left Roosevelt Field in New York on 20 May 1927, piloting a plane named The Spirit of St. Louis. 33 1/2 hours later he landed in Paris to a hero's welcome and global fame that stayed with him the rest of his life. During 1939 and 1940, Charles Lindbergh was a vocal opponent of American entry into World War II. However, after the Japanese attack at Pearl Harbor he joined the war effort, eventually flying 50 combat missions in the Pacific. Lindbergh was also part of a famous criminal case: his son was kidnapped in 1932 and later found dead, and the case became a public sensation. A German immigrant named Bruno Hauptmann was convicted of the crime and executed, though in the years since some have claimed he was wrongly accused. In later years Charles Lindbergh and his wife, Anne Morrow Lindbergh, were widely known as advocates for environmental conservation. Charles Lindbergh's 1953 autobiography The Spirit of St. Louis won the Pulitzer Prize.

Charles Lindbergh was followed by Amelia Earhart, the first woman to fly solo across the Atlantic Ocean... DNA tests taken in 2003 confirmed that Charles Lindbergh was the father of three German siblings: David and Dyrk Hesshaimer and Astrid Bouteuil. The three, who requested the tests, said that Lindbergh had carried out an affair with their mother, Brigitte Hesshaimer, from 1957 until his death in 1974. It was later revealed that Lindbergh had four other children in Europe: Two by Hesshaimer's sister Marietta, and another two by his personal secretary, known only by the name of Veleska.
