Web Sites

[PBS American Experience: Mount Rushmore](#)

This resource contains descriptive and educational links about one of our country's most beloved national monuments: Mount Rushmore. Features interesting, little known facts about the rationale, creation, and completion of the famous "tribute to democracy." Includes a 'Teacher's Guide' for integrated lessons in civics, history, economics, and geography.

Hardware/Software

More reasons to use 3D Touch

When 3D Touch was first introduced last year with the iPhone 6s and 6s Plus, it seemed more of a novelty than a real feature. With iOS 10, however, you can use 3D Touch in new, useful ways, from creating widgets by deep-pressing on app icons to interacting with dynamic notifications from the lock screen.

Use 3D Touch in your Notifications to reply to a Message, accept a Calendar invite, or even see where your Uber is on a map. And from the Notifications screen, you can also use 3D Touch to clear all your notifications at once.

Hints/Tips

Bye, bye native apps

With iOS 10, you won't ever have to see Stocks on your home screen ever again. Apple's latest release gives you the option to remove native app icons. You're not fully uninstalling the app, however, just removing the Home screen launcher and any user data.

Apple has pointed out that a native app's main functionalities (and storage size) remain even if it has been removed from the Home screen, so that the rest of iOS doesn't crash. You can now "reinstall" these native apps from the App Store if you want to launch them again from your Home screen.

Riddles You Can Tell in Class

1 - Why didn't the nose make the basketball team?

2 - What is the difference between a heavyweight boxer & a man with a cold?

3 - Does it take longer to run from first base to second or second base to third?

1 - He didn't get picked.

2 - One knows his blows and the other blows his nose.

3- Second base to third because there is a shortstop.

This Day in History
