Dentist's Day

Date When Celebrated: Always March 6

Dentist's Day is a day to display a big, toothy smile. After all, your Dentist plays a role in that big, bright smile. He's an important person in keeping your smile bright, and your teeth and mouth healthy.

If your Dentist is such an important person, then why are we so scared of the next dental visit? Is it perhaps the fear of discovering a cavity? Maybe, he will find the beginnings of gum disease? The fear of the dentist ranks right up there with.... the fear of pulling teeth!

[KidsHealth: Going to the Dentist](http://kidshealth.org/en/kids/go-dentist.html)

This article tells all about what happens when you go to the dentist.

[American Dental Association: Be a Dentist](http://www.ada.org/en/education-careers/careers-in-dentistry/dental-specialties)

From the American Dental Association, this page informs those with an interest in a career in dentistry. It includes information about professional associations, "day in the life" profiles of dentists, a list of ten reasons dentists enjoy working in their field, planning guides for high school and college students (PDF) and video (Adobe Flash). The page also links to a list of higher education programs within the site.

iOS 10: How to fix that annoying email ordering problem

There is a lot to like in iOS 10, but Apple's slightly annoying decision to place your most recently received email at the bottom of the email thread isn't one of them.

It's because of this that when you try to open a threaded conversation to read your most recent email you find yourself madly scrolling down the page.

Here is how to fix this so the most recent email sits at the top of the threaded stack, making it a little easier to find:

- Open Settings>Mail
- In Mail Settings, enable the Most Recent Message on Top setting by ticking the checkbox to green (on)
- In the future, your most recent email will be easy to find when you open a thread.

Hints/Tips

Fastest way to get to Preferences

It happens, sometimes we all need to change an application's Preferences, so we forage through the Menu to get to those settings..

Or, we just tap ⌘ + , (That is, use Command and the Comma) to open the preferences of almost every application. Not a lot of people know that

Riddles You Can Tell in Class

1 - There were two elephants under one umbrella, why didn't they get wet?

2 - How do you know if there are two elephants in your fridge?

3 - Why do elephants have trunks?

1 - It wasn't raining.

2 - You can hear them talking.

3 - They'd look pretty stupid with glove compartments.

This Day in History

Birthdates which occurred on March 7:

1872 Piet Mondrian Holland, abstract painter (Broadway Boogie Woogie)
