Ear Muff Day

Date When Celebrated : Always March 13

- Ear Muff Day celebrates a warm invention...the ear muff! People in cold climates can really appreciate this day. And, they are ever so thankful to the person who created the ear muff. If you live in Florida, you might not even know what an ear muff is.
- Ear muffs keep your ears warm, and protect you from ear infections and earaches resulting from icy cold wind and weather. Manufacturers have responded to their popularity with a variety of designs and colors, making one to fit almost anyone's personality.
- It is really easy to celebrate Ear Muff Day.... just wear your ear muffs!

Origin of "Ear Muff Day":

Big-eared Chester Greenwood is the father of the Earmuff. Greenwood patented the "Champion Ear Protector" on March 13, 1877. It later became known as "ear mufflers", and was eventually shortened to " earmuffs".

[Journey Into the World of Hearing: The Ear](#)

See several animations explain the function of the human ear and illustrate how we hear sounds.

Hardware/Software

1Password 6

AgileBits' 1Password 6 (\$3 per month subscription fee; available on the App Store as a single-purchase license for \$65) is perhaps one of the most venerable members of the family of password manager programs, and one that, with its newest version 6.0 release, aims to retain its position as the leader of the pack. Its great feature set, longevity, and ability to rely on multiple synchronization services, make this app one of the very best of its kind.

Hints/Tips

How to Use Tabs in Pages for Mac

Pages for Mac has gained the ability to use Tabs, allowing for tidy document management within the Pages app when having multiple documents open simultaneously.

To use Tabs in Pages, you'll need to enable the Tab bar in the Pages app, which is not visible by default whether the Pages for Mac app is in windowed mode or full screen. Without the Tab bar visible, you can not open or access new tabs in Pages.

Be sure you're on a recent version of Pages, updating via the Mac App Store may be necessary to insure that you have a modern version of Pages that supports Tabs. If you do not see Tab support, you do not have a new enough version of Pages software on the Mac and therefore need to update.

Enabling & Using Tabs in Pages for Mac

1. Open Pages on the Mac as usual, then pull down the "View" menu
2. Choose "Show Tab Bar"
3. Once the Tab bar becomes visible, click the [+] plus button on the side to open a new tab (or several)

Once you have shown the Tabs bar in Pages, it will persist whether the Pages app is in windowed mode or within fullscreen mode.

Pages Tabs on Mac in fullscreen mode

Pages Tabs can be navigated between, opened, and closed just like browser tabs in Safari, Tabs in Finder, using Mail tabs on Mac, Terminal tabs, or

anywhere else tabs are located throughout Mac OS and apps which support the feature.

Riddles You Can Tell in Class

- 1 - *How can you tell if an Irishman is having a good time?*
- 2 - *What do you get if you cross poison ivy with a four-leaf clover?*
- 3 - *What would you get if you crossed a leprechaun with a Texan?*

- 1 - He's Dublin over with laughter.
- 2 - A rash of good luck.
- 3 - A pot of chilli at the end of the rainbow.
